

Generation to generation

JACOB JENSEN™

For an even better view of the weather...

The Weather Station range – designed by Jacob Jensen – is a range of unique and functional products to help you keep an eye on the weather and time. The range comprises a total of eleven products: Indoor and Outdoor thermometers, Barometer, Radio controlled clock, Alarm clock, Hygrometer, Cordless Rain Gauge, Cordless Temperature station, Thermometer sensor, Table stand and Wall mounting plate. With the classical Jacob Jensen design it is a pleasure to keep an eye on the weather. All year round.

Indoor thermometer

For measuring room temperature.

Memory for minimum and maximum readings.

Choice of Celsius or Fahrenheit.

RRP ex. VAT EUR 33,50

Outdoor thermometer

For measuring outdoor temperature.

Memory for minimum and maximum readings.

Choice of Celsius or Fahrenheit.

RRP ex. VAT EUR 33,50

Barometer

Displays current barometric pressure in two different and optional units of pressure (mb/hPa).

Symbols to indicate weather forecast. Possible to set height above sea level when installing the Barometer.

RRP ex. VAT EUR 75,00

Radio controlled clock

Receives a time-setting radio signal and indicates the exact time in a 24-hour format. Furthermore provided with a date indicator, an alarm with two types of signal, a snooze-function, a backlight for the display and a keylock. Also possible to set the time manually.

RRP ex. VAT EUR 50,00

The eight main products in the range are easy to read and operate. In brief, a typical result of Jacob Jensen's way of thinking: unobtrusive and elegant with a perfect balance between form and function. Just four buttons, each with their function, memory and a display. The products in the range can be mounted together, either on the wall or on a table stand. Can also be mounted individually.

Alarm clock

24-hour clock with alarm function. Built-in light and snooze function.

RRP ex. VAT EUR 33,50

Hygrometer

For measuring the relative air humidity in the home.

Memory for minimum and maximum readings.

Shows relative humidity in per cent and indoor climate status: dry, humid or comfortable.

RRP ex. VAT EUR 37,50

Rain gauge

Cordless Rain gauge consisting of a receiver and a collector. Monitors the daily rainfall and the total rainfall since last reset. Memory for a nine-day rainfall history and for an alarm at a given rainfall.

RRP ex. VAT EUR 66,00

Temperature station

Cordless Temperature station.

Displays the temperature at the location of the Sensor. Supplied with one sensor. Additional sensors available separately and a total of three sensors can be used.

Features a memory for each sensor, a reset button and choice of Celsius or Fahrenheit.

RRP ex. VAT EUR 66,00

For nice conversations...

The telephones – designed by Jacob Jensen – are unique and functional products. The handset is slim and by gently pressing on the upper part of the handset, it smoothly places itself into your hand. The telephones are in brief a typical result of Jacob Jensen's way of thinking: unobtrusive and elegant with a perfect balance between form and function. With the classical Jacob Jensen design it is a pleasure to speak on the telephone.

Telephone 1

The Telephone 1 is small and exquisite. The keys placed on the base, directly under the handset, make it easy to operate. The telephone is equipped with a memory for the most used number, ten secondary numbers and a redial function for the last number called. The R-key is for calls using a switchboard, with mute function in the handset and a high or low ringing tone adjustment.

Colour: black/silver with silver coloured keys.

Delivered in giftbox with user manual.

RRP ex. VAT EUR 42,50

Telephone 3

The Telephone 3 displays the number dialled. The telephone is equipped with a memory for the four most used numbers, ten secondary numbers and a redial function for the last number called. The R-key is for calls using a switchboard, with mute function in the handset and a high or low ringing tone adjustment.

Colour: black/silver with black keys.

Delivered in giftbox with user manual.

RRP ex. VAT EUR 74,50

Telephone 5

The Telephone 5 is equipped with a caller ID function for storing up to 80 numbers. The telephone displays the number of new incoming calls and by pressing one key only you can make a direct call from the caller ID memory. The telephone also displays the number of new, recorded messages plus the date and time. The caller ID and Message waiting functions require that your telephone line is provided with caller ID/Message/Answer services by your network provider and that they have been activated.

The time, date and LCD contrast is easily set using the functional keys.

The telephone is further equipped with a mute function in the handset, on hook dialing, HI/LOW volume adjustment for the ringing tone, the handset receiver and for on hook dialing.

Colour: black/silver with black keys.

Delivered in giftbox with user manual, battery compartment and batteries.

RRP ex. VAT EUR 85,25

All analogue telephones have a removable stand which make the telephones both wall and table mountable.

For cordless conversations...

The JACOB JENSEN™ Telephone 80 is a table or wall mounted, cordless, digital telephone equipped with the latest DECT technology. It has a long range of operation with digital call clarity and user-friendly menu-driven functions. The handset is light and slim in an elegant design with light behind the keys. It can be placed in the base with the display facing up or down, charging in both directions. The Telephone 80 is the result of careful consideration to unify the pure lines of Jacob Jensen's design with the latest telecommunication technology.

Telephone 80

Six handsets can be registered to one single base unit to perform function of a mini-PABX system which offers you functions of intercom and call transfer between handsets (GAP compatible).

A unique feature enables you to make and receive hands-free calls when the handset is placed in the base.

The Telephone 80 is equipped with a wide range of functions, giving great convenience in managing your telephone calls e.g. Caller ID (Type 1&2 and DTMF), Phone Book, Redial List and Cal Log List. The feature list also includes: adjustable volume, intercom between handsets, paging from base, time and date stamp, mute, selectable specially composed ringing tones and much more.

A fully charged handset has 12 hours talk time or seven days standby time.

Furthermore, the telephone is provided with an intelligent low radiation feature ensuring that the strength of the radio frequency signal (RF), automatically is adjusted to the lowest possible.

Colour: anthracite / silver.

Delivered in giftbox with user manual and battery.

RRP ex. VAT EUR 200,00

Just in case...

The Smoke alarm – designed by Jacob Jensen – is unique and functional. It comes in two versions – an optical version with intelligent features and an ionising version without the intelligent features. The smoke alarm is an outstanding example of the precision and functionalism which all JACOB JENSEN™ products are known for. With the classical Jacob Jensen design it is a pleasure to secure your home.

Smoke alarms

Optical version

An optical smoke detector which reacts speedily to all forms of visible smoke - including smoke from smouldering embers. Checks and adjusts – daily – its own sensitivity for optimal smoke detection. The alarm is equipped with an acoustic and visual alarm which along with a loud signal in case of fire, also gives a call when the battery needs changing, when the alarm needs cleaning or in the event of technical disorder. The red button is used to test and to indicate that all is as it should be, but further to reduce sensitivity for 10 minutes in order to avoid false alarms.

Colour: silver / black with a red test button.

RRP ex. VAT EUR 56,00

Ionising version

An ionising smoke detector which reacts speedily to especially very hot and fast growing fires. An alarm indicates change of battery. The red button is used to test.

Colour: anthracite / black with a red test button.

RRP ex. VAT EUR 33,50

Best protection is obtained by installing both types of smoke alarm in the home. Both Smoke alarms are delivered in giftbox with user manual and an innovative mounting nozzle incl. screw and plug.

Easy and simple, also for dismounting and changing the battery. Battery installed.

Both smoke alarms are tested and fulfills the requirements of Nordtest Method NT ELEC 004.

A neat welcome...

The JACOB JENSEN™ Doorbell is in tune with the well known, clear design language recognized by people all over the world. The cordless Doorbell consists of a Bell push and a Chime offering five different, specially composed high sound quality tunes. Listen to Jacob Jensen knocking at the door, a classic town hall bell, a contemporary or oriental inspired tune or a low-frequency tune, designed especially for the hard-of-hearing. The classical Jacob Jensen design makes welcoming a pleasure.

Doorbell

The tune is set on the individual Bell push for the convenience of assigning up to five different tunes to each one, making it easy to identify which Doorbell is ringing. The sound level can be set to high/low or off. Lights on both the Chime and the Bell push will illuminate when the bell is activated or the batteries need changing.

The Doorbell is supplied with one Bell push and batteries are included. Alternatively a plug-in mains adaptor can be connected to the Chime.

One single Chime can operate with an unlimited number of Bell pushes which are available separately. The Chime can be free standing or wall mounted, either using screws or a JACOB JENSEN™ Mounting plate. The Bell push can be mounted with screws or double-sided tape. The maximum working distance between the Chime and the Bell push is up to 150 meters and a coding system ensures that there is no interference to or from any nearby cordless product.

Delivered in giftbox with user manual, screws and plugs.
Batteries included

RRP ex. VAT EUR 92,00

Extra Bell push RRP ex. VAT EUR 38,00

A personal welcome...

The JACOB JENSEN™ Doorbell USB is made with focus on good sound and volume and, of course, unique and functional design. It is delivered with specially designed ringing tones ready for use – including a low-frequency tune, designed especially for the hard-of-hearing. Furthermore, it is possible to download or create your own tunes in MIDI format – up to three different – by use of a computer, the enclosed software and USB cable. Now you can give your guests a very personal welcome, and the three tunes can be replaced again and again...

Doorbell USB

The sound can be high, low or off. A diode on both Chime and Bell push not only illuminates, when someone is ringing the bell, but also when batteries are low. An unlimited number of Bell pushes can be connected to the Chime. These can be bought separately. Likewise, several chimes can be combined as required.

The distance between Chime and Bell push can be up to 200 metres and the Chime is designed to be free standing, in order for it to be placed and moved as needed. Can also be wall-mounted by means of the enclosed fittings. The Bell push is easily mounted by means of the enclosed safety fittings and screws.

The Doorbell can be set with 64 different personal codes, which ensures that the bell only rings when it should.

The Doorbell is supplied with one Bell push and batteries are included. Alternatively a plug-in mains adaptor can be connected to the Chime.

Delivered in giftbox with user manual, mounting fittings, screws and plugs. Batteries included.

RRP ex. VAT EUR 116,00

Extra Bell push RRP ex. VAT EUR 49,00

The importance of weight and time...

The JACOB JENSEN™ Scale is characterized by the simple and linear design recognized by people all over the world. The scale is wall mounted and as such always at hand. The scale is simple to use – just press the top key and the front is released for gentle lowering into the open position. The simple design of the scale adds further elegance to a stylish kitchen.

The JACOB JENSEN™ Timer is unique and functional. Set the time required by gently pressing the functional key. A few moments after the time is set, the Timer starts to count down displaying hours and minutes. When the programmed time is finished, the Timer activates a clear acoustic and visual alarm. With the classical Jacob Jensen design it is a pleasure to count time.

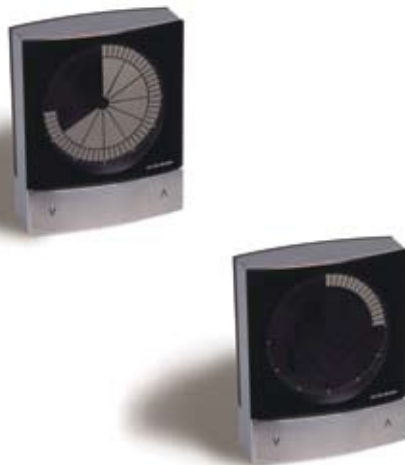

Scale

Pressing the top key easily opens the scale. When the display shows 0, the scale is ready to use. The scale weighs from 1 gram to 2 kg with a graduation of 1 gram. Choose between g/kg or oz/lbs. The accuracy is +/- 0,5% of the contents. The TARE function makes it possible to reset the weight gradually when adding ingredients. If not used for two minutes the display turns off automatically. To re-activate the display, simply press the ON/TARE key.

Made of steel, glass and ABS.

Delivered in giftbox with user manual, mounting plate, screws and plugs. Batteries installed.

RRP ex. VAT EUR 124,00

Timer

Counting down time in style. The time can be set from one minute to 12 hours. The time set can be adjusted up and down during countdown. Reset the programmed time by gently pressing both sides of the functional key for two seconds. Acoustic and visual alarm for two minutes, which is deactivated by pressing any side of the functional key. If the alarm is not deactivated, the Timer continues to count down overtime for a maximum of one hour.

Made of ABS, PMMA and steel.

Colour: black/silver with key of brushed steel.

Delivered in giftbox with user manual. Batteries installed.

RRP ex. VAT EUR 41,00

When time calls...

The JACOB JENSEN™ Wake up clock gets you up and about at the set time – gently at first, then with a more frequent and determined tone. It can be postponed - again and again - by pressing the top key. The clock is also equipped with a built-in background light, which is activated by the alarm going off or by gently pressing the top key if you wish to see the time in the middle of the night. The interface for setting time or alarm is straightforward and easy, and the center symbol will clearly tell you if the clock is set to call or not. It even has a key-lock that can prevent use of backlight and activation of alarms during travels. The classical Jacob Jensen design makes it a pleasure to watch the time pass by – in a distinct way.

Wake up clock

The clock is equipped with a crescendo alarm and an infinite snooze function which postpones the alarm for eight minutes each time it is activated.

The background light is automatically turned on when the alarm goes off but can also be activated on demand by pressing either side of the top-button momentarily.

Setting of the time is easily done by the front key and the display indicates whether you are setting the time or alarm time and whether the alarm is activated or not. The inner circle flashes once every second and the alarm symbol is shown in the center when the alarm is active.

A key-lock function secures the buttons and ensures that the clock is not activated whilst packed in the suitcase.

On the illustrations the time is 11.15 a.m. or 11.15 p.m.

Made of ABS, PMMA and steel.

Colour: anthracite or silver with keys of brushed steel.

Delivered in giftbox with user manual. Batteries installed.

RRP ex. VAT EUR 56,00
